Sheet Metal Fabricator

Who we are:

M&S Machining is an advanced manufacturing company with over 25 years of experience serving defense and aerospace industry leaders such as Northrop Grumman, General Dynamics, and Space X. We operate in a clean, climate-controlled, modern facility filled with state-of-the-art equipment and provide our team with all the latest tools necessary for success. We believe strongly in the growth and development of our employees by offering an environment with exceptional opportunities that can unlock your highest potential. We welcome candidates of all levels of experience and are excited to work with those individuals who strive to be the best.

Who were looking for:

We are seeking candidates who have experience fabricating sheet metal products. This position will be working in a fast-paced environment, producing small quantities of unique, sometimes complex, sheet metal parts. M&S Machining is looking for candidates with all levels of experience and offers an opportunity to train and further develop one's fabrication knowledge and career.

What we bring:

- Area leading pay!
- Career advancement.
- Opportunity for growth
- Weekly pay
- IRA with 3% match
- Health, Dental and Vision insurance
- Paid Holidays
- Paid Time Off
- Relocation assistance and Travel reimbursement
- Direct Hire position
- Full Time, Day Shift, Monday through Friday, Overtime

What you'll bring:

- Drive to continuously learn.
- Interest in math and science.
- Dedication to career growth.
- Strong communication skills with the ability to overcome challenges.
- Innovative and creative thinking.

What you'll be doing:

- Fabricating geometrically complex sheet metal components using an array of equipment including but not limited to a CNC brake press, fiber optic laser, shrinker/stretcher, roll former, etc.
- Using and selecting required hand tools, machinery, measuring instruments, and abrasives in accordance with detailed work instructions and blueprints.
- Setting up and tearing down multiple programs on a CNC brake press multiple times a day/week.
- Working with the quality department to approve first pieces in a timely manner to start producing parts.
- Manage multiple projects effectively and efficiently to meet or exceed our customers' expectations.

Favorable if you have:

- Experience programming and setting up a CNC brake press and/or fiber optic laser on a wide variety of different parts and materials.
- Background in CAD, CAM, drafting, or engineering.
- Experience using various measuring equipment including but not limited to height stand, calipers, micrometers, surface plate, CMM, etc.
- Experience hand forming parts using molds, shrinker/stretcher equipment, and roll forming equipment.

Not From the Area?

M&S Machining offers relocation assistance for qualified individuals! We are surrounded by rolling hills and beautiful farmland while also offering all the amenities of a large metropolitan area. We are located only 15 minutes from Lexington and 1.5hrs from Cincinnati and Louisville. The local economy is thriving with an excellent job market and a multitude of opportunities for your family. All of

this combined with a local housing market that is significantly cheaper than the national average, makes central Kentucky a great place to call home!
